

## Future Plans

- To further educate teachers and parents by organizing workshops, and encouraging them to undertake various courses in this field.
- To setup a vocational unit where children are suitably employed/engaged and if possible, can earn also.
- To start a social awareness campaign to change the attitude of society towards these special children so that a special child is not a cause of psychological stress for the family.

## Our Goals

- We wish to emerge as a centre which can answer all the queries & provide all the facilities needed for proper care & development of special children.
- The special children are accepted in the family and society as a lower functioning part of a spectrum.
- No time is wasted in arriving at a diagnosis and looking for the right course of action whenever a problem is encountered during a child's development.

## Facilities Available

- Special education.
- Physiotherapy.
- Speech therapy.
- Behaviour modification.
- Medical assistance as required.

## Challenges Handled

- Cerebral palsy
- Mental retardation.
- Autism spectrum disorders.
- Hyperactivity & ADHD.
- Speech and language delays.
- Behavioural problems.
- Delayed development due to any cause.

## Acceptable Age Group

- 3 years onwards.

## DAY CARE CENTRE

(For CHALLENGED CHILDREN)

A  
Special School  
For Children With  
Special Educational Needs

## About Challenged Children

By challenged children, we mean the children who need special effort and care for their upbringing & education due to some underlying problem like cerebral palsy, mental retardation, autism, hyperactivity etc. Due to these challenges, the children usually do not adjust in the mainstream schools.

## What is needed

A challenged child needs an individualized effort. The child needs to be assessed for the areas of interest & skills and his weaknesses. The aim is to enhance & utilize his positive skills. The weaknesses are to be removed by help of supportive therapies as far as possible. Emotional needs of the child must be adequately taken care of while teaching.

## Challenges Handled

- Cerebral palsy
- Mental retardation.
- Autism spectrum disorders.
- Hyperactivity & ADHD.
- Speech and language delays.
- Behavioural problems.
- Delayed development due to any cause.

## Background

The school was started in January, 2007 with the aim to provide all the facilities needed by a special child under one roof and in a coordinated manner so as to bring about maximum growth in the child and make him independent. The whole effort was motivated by the distress faced by parents during upbringing of a challenged child.

## About The Centre

Sankalp Day Care Centre is a non-profit and non-government institution which aims to cater the needs of challenged children and their families located in the heart of Kanpur city. The centre has a dedicated staff and is headed by medical doctor who is also parent of a challenged child.

## Support From Society

We look forward to your support with open arms in following ways -

- Make a donation/sponsor a child. (donations exempted under section 80G of IT Act 1965)
- Sponsor an event for children.
- Volunteer services for teaching various skills
- Adopt a child with his family for their social and emotional support.
