

Dear Asha Purdue,

Thanks for sparing your valuable time. As you know manasa is a non-profit organization located in Hyderabad, India working for the welfare and integration of intellectually challenged by implementing various programs for their development. Your chapter has been supporting us since 2011, and till date we have received \$18,046 as financial help to meet our educational expenses. Since it was getting expensive for using rented premises, we decided to construct our own facility and due to this construction we are in a lot of debt. The new facility is a four storied building, with fully functioning second and third floors. But the first floor does not have an outer wall, and it is a definite threat for everyone's safety, especially children safety. The total cost for constructing this wall is

1. Brick work: 3 Lakhs

2. Plastering: 1.5 Lakhs

At present atleast 1-2lakhs from your organization will be a very big blessing to our organization

With many good wishes.

P.Sarvalaxmi

President, Manasa
