### Which items of budget do you think we should support? (13 responses)

### Comments (2 responses)

We should look into details of their other source of funding and try to restrict to 10K or so. If they have enough resources, we should concentrate more on other projects which doesnt have any source of funding. For this year, I am ok with 13K but for next year onwards, we shod only support their most basic requirements which are not covered by others.

Need to know more about furniture requirement
