It is important to support individuals with a vision so that new ideas can be implemented

Gautam has done a commendable job in ensuring quality education of children, from the poorest section of society, through Diksha. I believe awarding the fellowship to Gautam would be instrumental in achieving the objectives of the fellowship. Therefore, I vote in support of awarding the fellowship to Gautam.

Gautam is a good dedicated candidate for Diksha and has innovative ideas for the over all development of the children at Diksha. He seems committed to the cause and a stipend support would help him devote his time better.

It is a new initiative to support a person. This might generate more ideas towards advancement of our society.

I think this is a great plan by Asha Purdue, to provide fellowship to Gautam. After looking through the application, it seems that this is pretty demanding, and needs like 80% of Gautam's time. I get that this is external work from Diksha itself. Will his work in Diksha be affected?

As per guideline max amount is inr 25,000 which will make a budget of \$4700 per year. Gautam's fellowship will be very valuable to Asha in general as well as for Diksha. We will like to see Gautam utilize his efforts in making more impact in the community as well as promoting the cause of improving quality education in Bihar, Delhi, Haryana area etc. His efforts in implementation of RTE will also be valuable.

From the fellowship application it is seen that Gautam has been involved in implementing numerous welfare programs and approaches for the underprivileged children which was also clearly discussed during the meeting that happened last week. So I feel that he can be supported with a fellowship starting for a period of 6 months to 1 year initially.

It is a good idea to implement Diksha successful initiatives to other projects as well.

Gautam would be a deserving choice for a fellow since he has implemented and been successful with many new things. Giving him an opportunity to try more things would be a good bet.

Please mention if you have any questions related to the fellowship application

No (2)

How will Gautam ensure that his fellowship work is outside of his coordinator role at Diksha?

Would like to ask for Gautam's specific plans on the conference call
