

## **Site visit report -Chennai Corporation School, Indra Nagar - November 3, 2018**

**By Jaya Suresh**

I usually visit the school for about 10 days a month , teach the children, discuss various issues regarding the children with the project teachers . I also follow up other gypsy children studying in other schools and visit those schools in the neighbourhood . I also take classes to gypsy children off and on at my house on weekends or provide space to maheswari/ saraswati to teach the children at my home.

Every day in the morning the project teachers spend a considerable amount of time in the colony collecting children and following up all the school going children. After the children arrive at the primary school I my focus on teaching English to the children. Today also I focussed on their lessons, phonic skills , reading skills and story telling. This year we have started remedial classes for other children of the school who are lagging behind. Children from fourth and fifth classes join in the English classes for a few hours. These combined classes are working well for both the school children and gypsy children. The school kids are picking up fast and by the end of the academic year I am sure they will improve further.

I give special attention to Arjun, ramya, vetri on several days as they will complete primary school soon and move to other schools and we will not have access to each of them in those schools for teaching. All three of them respond with enthusiasm and are progressing well.
