Dear Sir

SUB: Requesting sponsorship for Salary Grant and Teaching Aids for the year 2018-2019

Greetings from Hope Public Charitable Trust, Ambattur

HOPE has been serving Special children with developmental disabilities over a decade through committed staff and members. Helping special children with education and other rehabilitative services has always been the primary focus. At present 110 special children are there in our organization. Special Educators, Therapist and Care takers help our children learn new abilities and adapt to the society.

Our school has been operating in meager funding and unable to provide for additional special educators, therapist and caretakers. So we request your organization to help us fund our projects so we could carry on the helping special children.

The new list and project are attached along with this letter. Kindly go through and become the change maker.

**HOPE PUBLIC CHARITABLE TRUST**

Hope Public Charitable trust is a Non- Governmental organization located at, Chennai, India. Our organization strives to “Promote the living conditions of challenged community by providing Special Education, Vocational training and Rehabilitation services”. Hope aims in removing stigma, creating awareness and empowering Special Children community. It also strives for the empowerment of marginalized women through various skill training programs. Our logo symbolizes “Hope” which means “Providing Self-confidence along with service to face life’s challenges to lead a meaning full life in the society”.

Hope trust has involved in carrying out welfare activities for the general public since year 2003 and became a legally formed body under Trust Act by the year 2007.

**VISION**

To serve as a **CATALYST** to uplift the **LIFESTYLES** of the underprivileged, socially neglected, mentally challenged and those who live below poverty line with special emphasis on women and children.

**MISSION**

- “Promoting the living conditions of the target community by a comprehensive service to Develop their values, skills and talent’s through self-learning and participatory programs”.
- Working collectively to promote the welfare and interest of the under-privileged, Socially Neglected and the marginalized people through joint actions programs like Special education, Vocational training, Skill training, therapy, Orientation programs and self-employment

## **PROPOSAL - I**

### **HOPE SPECIAL SCHOOL**

Hope special school for mentally challenged children had its humble beginning in 2003 with 3 children, 2 volunteers and as Special educator. Now the school caters to the needs of almost 65 children with 12 teaching and non-teaching staff members. Owing to financial constraints, we are unable to provide additional therapy and individual care to the students with multiple needs due to which the improvements and betterment of children are hindered.

### **INTRODUCTION**

Developmental delays are primary steps in identifying childhood disorders and a child can be trained and equipped to overcome the disability factors and be a functional citizen in the society. By making an individual or child with multiple needs to be accepted and become a survivor of stigma can be done through education. Educating children with multiple needs is to equip them with self-help skills, and make them to be more productive. Through sufficiently educating and equipping them with various skills disability reduces and the individual becomes socially functional.

### **NEED ASSESSMENT**

Majority of the children are hailing from low socio economic background where education with all the therapies include are provided at free of cost or minimal cost. So the income generative nature of our school is very less. Besides, the school has been operating over a decade in a rent building with only basic amenities. The cost of operating is going very high month by month yet the means to fund the project is at stake.

Only a minimal amount of funding is received through the government for two special educators and one caretaker. The need for more staff and other therapist has failed to get into their notice. We have incorporated a combined multidiscipline approach so that children can learn to survive the society effectively. This includes Special educators, different Therapist such as speech, occupational and physiotherapy, Social worker as Counselors and care takers. This has helped to bring much drastic development in children.

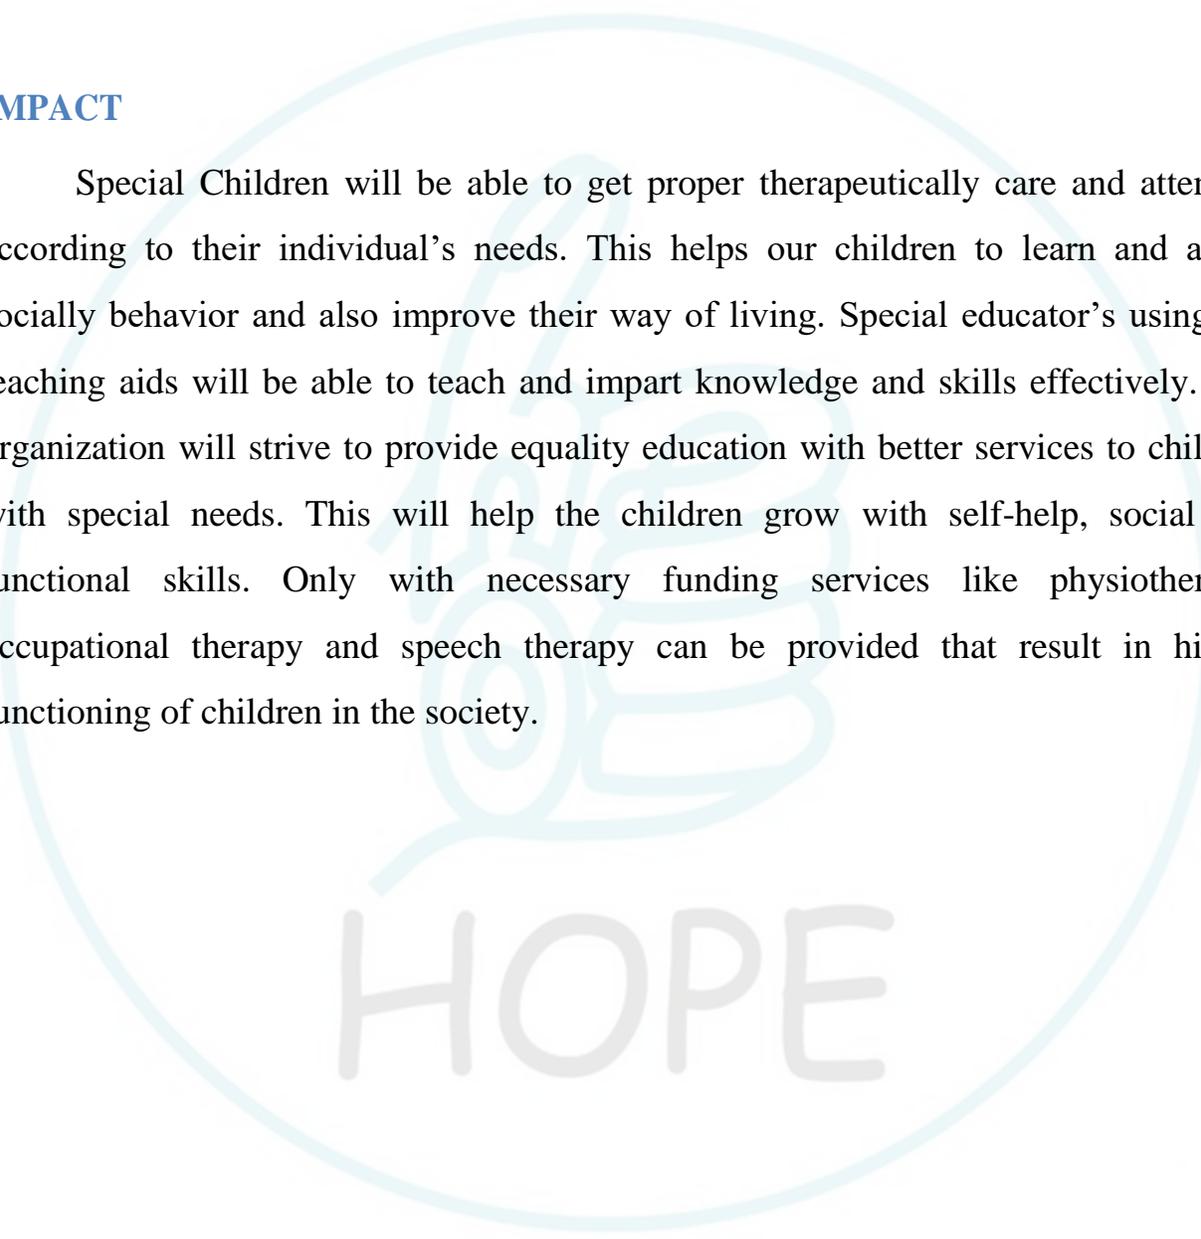

We have survived mainly through well-wishers, supporter and public donation all these years. Asha for Education has helped our children in the way of acquiring special education for past years.

## OBJECTIVES

- To seek funding for “Remuneration of Employees” who work for Hope special school.
- To seek funding for teaching and other therapy aids.

## IMPACT

Special Children will be able to get proper therapeutically care and attention according to their individual’s needs. This helps our children to learn and adopt socially behavior and also improve their way of living. Special educator’s using the teaching aids will be able to teach and impart knowledge and skills effectively. The organization will strive to provide equality education with better services to children with special needs. This will help the children grow with self-help, social and functional skills. Only with necessary funding services like physiotherapy, occupational therapy and speech therapy can be provided that result in higher functioning of children in the society.

HOPE
