Subject: Visit to Hope Annambedu

Hi Raghu

Thank you for choosing me to visit Hope, on 23rd June 2026 around 11.15 am reached the Hope facility for care and rehabilitation of autism persons.

Building at Annambedu is new one and overall well maintained. Nagarani founder and co-ordinator of the organization greets me and explained me the history of the organization. She introduced some of the available teaching and non teaching staff.

Witnessed one Babu played keyboard very well and his coach is so dedicated to improve the life of Intellectually disability (ID) persons, one more person also played key board his coach brief me their improvement, it is proof of their relentless efforts to up bringing the ID kids.

One kid named Magesh demonstrated yoga postures with its name, his body is so flexible and he has done it with lots of enthusiasm. When I asked him to do some mentioned asanas he has done that also, it's clear evidence that he could understand and execute like a normal person, hopefully that's because of proper guidance and coach, Good coaching and care really heartening.

They sing the song of Tamilthai vazhthu very well it shows that they are not only developing individually also show the synchronization in the group. Every bit of the kids demonstration is the proof for the efforts of Nagarani and her team.

One boy was restoring the LED bulb and they are selling it for a merger amount, that boy handles the soldering rod with good professionalism. However I have advised them not to use led soldering rod as it's a banned material to be used.

One boy preparing incense sticks using a machine with little guidance, they could understand the instructions and follow it to bring results.

They have shown me lots of photos every photo has been framed well, the significance is that the photos are framed by the ID persons who are undergoing training in HOPE. Really it requires lot of patience and passion to up bring the ID persons to function like a normal person hat's off to their efforts.

All classes rooms are equipped with digital board supported with AI.

I was listening to the band team, Nagarani said this band team goes to govt. Function to beat the band during inauguration ceremony.

Maintaining the building spick and Span.

Visited the auditorium which could accommodate about 300 people, Nagarani said that this auditorium to accommodate all site persons during functions and festivals.

Nagarani service is Nobel let God give her good health and support to continue her service and passion on to her successor.

Once again thank you Raghu, without your request I might not got this opportunity.

Loving
SNM
