M. Kannan is 7 years boy child, his father is Manigandan and mother is Kannammal. He is from Melmalayanoor Village, the contact mobile number is 8680887374. He is born with 1st degree consanguineous marriage.

The mother underwent the regular medical check up from the third month of the pregnancy. During the 8th month check up the doctors shared the information that the fetus is seems to be defective. During the delivery the doctors said that the circumference is big, so the chance of the normal delivery is very less. Then the child is delivered in the Caesarian method, during the delivery the child weighed about 3.30 kg., After the birth the child is cried after two hours only, due to the lack of mother's milk the child is fed with cow's milk.

During the developmental stage the mother and the family members noticed that the child's growth is lesser than normal child, the child seems to be 4 years of age and the function of the body also reflect the same.

The toilet skill of the boy is that he can pass urine in his own effort, while he wants to use the toilet he shows the fingers that he want pass stool. He can able to use the toilet, but he is not able to clean independently, some one has to help him. Every day morning he can able to brush his teeth using tooth brush and paste.

He says his hunger by holding the stomach that he wants food, he can eat the food with a little assistance (split the food into portions)

He is dependent to wear his own dresses. He can identify his father, mother & family members. He can say "Amma & Appa". If we ask him who is Kannan, he can index himself. He is not able to use communication skill. He can able understand what we explained to him, but he is not able to do it back. His socialization with his elder sister and same age children is good, he can able to play with them. He use to watch television (comics channel).

His peculiar attitude is he uses to uphold his head and shook it continuously.

The child J. Perarasu is the 3 years boy, his date of birth is 22.07.2013, his native village is Thazhangunam, his father is Jayabal, mother is Bavani. His father works as a seasonable coolie earning around Rs. 4,000/- per month.

The prenatal information shows that the mother underwent the regular and routine medical checkup and underwent all the instruction of the physicians. The delivery is carried out in the Government Hospital, Avalurpet, he is born with full term delivery, during the delivery the child weighed 3.5 kg and the doctors said that the child's lower limbs are paralyzed. The parents provided the child all the immunizations.

The child achieved the milestone (head control, crawling, sitting, standing, walking) delayed. His visual and auditory abilities are good. The activities of daily living skill is need to be trained, he is not aware of passing urine & stool, but after passing it he inform by one word communication. He can say “Appa & Amma”. His socialization is good, he mingles with every body.

As the doctor informed during delivery that his lower limbs are paralyzed, he can able to move from one place to other place by crawling.

He can able to repeat the words which the trainer said to him, he also tries to follow it. If we call him by his name he is responding to it.
