**Summary of results achieved:**

- Education and On-ground work done in a total of 26 schools in Central and Eastern Rajasthan, benefiting a total of 5279 school children and 313 school staff.
- 20 exposure visits were done with 20 schools, involving 1002 school children (about 20% of total school children population), 155 school staff and 46 parents.
- On-ground work was done in 16 schools around harvesting rainwater from school rooftops, which will result in new storage of 14.17 lakh litres of rainwater. On-ground work was done in 4 schools around groundwater recharge, which will lead to recharge of 8.03 lakh litres of rainwater (after deducting storage) into the ground. This will fulfill 100% of drinking water needs of the school and about 20% of the domestic water needs of the schools as a whole respectively.
- 4 schools met their fruit and vegetable needs through the school midday meals, for 2 months of the year in winter, through the new Kitchen gardens setup.
