Summary of results achieved:

- Education and On-ground work done in a total of 34 schools in Central and Eastern Rajasthan, benefiting a total of 5986 school children and 411 school staff.
- 20 exposure visits related to ecological education were done with 22 schools, involving 1209 school children (about 20% of total school children population), 156 school staff and 77 parents/villagers.
- On-ground work was done in 16 schools around harvesting rainwater from school rooftops, which will result in new storage of 12.82 lakh litres of rainwater. On-ground work was done in 7 schools around groundwater recharge, which will lead to recharge of 9.95 lakh litres of rainwater (after deducting storage) into the ground. This will fulfill 100% of drinking water needs of the school and about 100% of the domestic water needs of the schools as a whole respectively.
- 7 schools met their fruit and vegetable needs through the school midday meals, for 2-3 months of the year in winter, through new Kitchen gardens setup.

- Trees were planted in a total of 11 schools.
- Engagement with MA Education interns from APU Bhopal in Jaipur, Jaisalmer, and Barmer government schools: 4 interns spent about 2 weeks developing activity and play-based ecological education modules around water, food, biodiversity, waste management and implemented the modules in government schools in these 3 districts, over the subsequent 4 weeks. We plan to build further on this work over the next 3 years.
