Apna Skool achievements:

Labour Card for Workers:

- Continuous efforts of Vijaya Didi, the entire team of Apna Skool, and the Labour office Kanpur (U.P), registration camp was organized for the workers of brick kilns, during December 23, 2017, to January 4, 2018. The registration of 344 workers and the subsequent preparation of the labour cards at various brick kilns, was possible due to the active intervention and facilitation of the Apna Skool team who personally went to the brick-kilns to help in the registration process. Apna Skool coordinators (L.K Shukla and B.N. Sharma) also facilitated in the distribution of the labour cards to workers at the respective brick kilns.

From this labour card, workers can get the benefit of various government schemes, under medical facility scheme registered workers are eligible to receive Rs. 3000 per year.
All the workers who were registered have received the labour card, and 85 workers have been enrolled for Medical Facility Scheme.

- Recently, on 11th September 2018, with efforts of Vijaya Didi, the team of Apna Skool, and the Labour office Nawada (Bihar), a labour camp was organized in Hanuman Gadi and Math Gulni, Nawada (Bihar).
  80 workers were registered in this camp, and more camp will organize for the rest of the workers.

Apna Skool Challenges:

Highlights of some of our key challenges-

1. **Drinking water and sanitation problem for workers at bricks-kiln:**
   On 1st May 2018, International workers day, for awareness and about rights and schemes for workers meetings with workers and Apna Skool was organized during this session, workers complained about drinking water and sanitation problem

   The owner of brick-kiln provides water from tube-well to crude pit, which is not fresh for drinking, but the workers are using this water for all purposes like washing dishes, bathing and even drinking. It is the only water facility available for them. This is the primary reason for these workers family often being ill. Families can get clean water if the kiln's owner provides them clean water storage facility.

2. **Electricity Problem at all the bricks-kiln**
   There is no electricity access to any of the brick-kiln, Even in this era, they use lantern at night, which is sufficient for the study of their kids.
