Message from President, MUKTI

As we approach the year 2011, we reflect back and see a year of great significance has passed. From MUKTI's perspective, unfortunately the year 2009-10 will be remembered as 'the year of Aila', the cyclone that wreaked havoc on the coastal South and North 24 Parganas districts of West Bengal on May 25, 2009. The cyclone washed away a diameter as huge as 250-350 km of land, flooded most of the Sunderbans, and left 10,00,000 helpless people with little or no access to food, safe drinking water, shelter or medicine.

Highlights 2009-2010

◆ Participated Cyclone Aila Relief & Rehabilitation program in Sunderban and helped more than 20,000 people from 20 Gram Panchayets of 5 Blocks.

◆ Started the movement 'Save the Sunderban' to save the world heritage site Sunderban from the effect of Global Warming.

◆ Started project GrEEN to promote use of solar and renewable energy in rural part of India.

◆ Newest chapter MUKTI Qatar started with their significant contribution towards project GrEEN.

◆ MUKTI website renovated with many new features like display of past & current project info, better menu based navigation, news updates, partner information etc.

MUKTI immediately joined the disaster relief effort. We have been engaged in relief and rehabilitation programs. We provided immediate relief in the form of cooked/dry food, water, shelter, utensils, mosquito nets, and medical camps. We followed it up by long term rehabilitation programs like the organic agriculture movement to restore fertility of the land and the community kitchen program to provide support to the people who found themselves on the verge of a famine-like situation. In short, MUKTI provided all the essentials to prevent further human fallout that usually follows great catastrophic disasters similar to the magnitude of Aila.

Scientists studying the effects of climate change have predicted that extreme weather, along with just a 45 cm rise in sea levels would submerge 75 percent of the Sunderbans. The sinking Sunderban islands are one of the first climate hotspots in India. It sets a precedent for the impacts of sea level rise which poor populations in low lying

coastal India will face in coming years. Increased displacement of people due to loss of habitation and land will increase India's count of climate refugees and add to the burden of poverty under

which we are already reeling. At this critical juncture where we only have eight years to act, strong and time bound mitigation measures must accompany measures for adaptation.

Lack of access to electricity is a great challenge to India's rural economy. The need for increased production of electricity in a growing economy often stands in conflict with the need for measures to mitigate global warming. An environmentally friendly way to electrify and boost the rural economy like that of alternative renewable would provide a way out of this deadlock.

MUKTI's Project GrEEN (Green Energy for Ecology and Nature) addresses this issue by promoting solar and other renewable energy sources for village livelihoods. In collaboration with organizations like TERI (The Energy Research Institute headed by Dr. R K Pachauri), Cosmos Ignite of Delhi, and One Million Lights of USA, MUKTI is all set to address the issue of electricity in the Sunderbans, and to fight global warming in the process.

The year 2009-10 will be also known for MUKTI family's growth in the form of Mukti Qatar. Recently a significant number of dedicated volunteers from Qatar came forward and formed the MUKTI Qatar chapter. MUKTI Qatar is committed to a focus on Indian socio-economic issues with a prominent vision-defined mission. MUKTI Qatar partnered with MUKTI India and TERI to make project GrEEN a success.

I must mention our continuation with well-known and appreciated projects like Book Bank, Coaching program, Village Computer Literacy Program (VCLP), Talented Student Sponsorship (TSS) and other projects in even larger scale than before, with great help and support from more than 500 volunteers and 11 collaborating organizations from around the world.

Thank you very much for all of your great help, and congratulations to all the dedicated activists for the success achieved so far. Let us continue to work together, so that we can continue to bring positive change to the silently suffering sections of society.

- Sankar Halder, President, MUKTI

Cyclone Aila: Relief and Rehabilitation Program

Cyclonic Storm Aila wrecked havoc on the coastal South 24 Parganas district of West Bengal on May 25, 2009. Aila was the second tropical storm formed in Northern Indian Ocean in 2009.

19 number and Bhasa villages and distributed clothes to the villagers. More than 1700 people were benefited with this program.

Villagers worked for the reconstruction so that they can stay safe from the flood during the next high tide. MUKTI provided food to all the people who worked for the

Facts:

According to an IANS report, as many as 5.3 million people have been affected by Cyclone Aila.

In state West Bengal, an estimated 40,000 homes were destroyed and 132,000 others were damaged.

In India, nearly 50,000 hectares of agricultural land was lost during the storm, costing an estimated Rs. 125 crore (US\$26.3 million).

Source: Wikipedia

Dry Food Help:

MUKTI immediately joined the disaster relief effort. They started moving the stranded people in affected areas to higher grounds. MUKTI distributed dry food and medicines to thousands of people in Braja-ballavpur, Namkhana, Haripur, Brajaballavpur GP, Kultali Block 19 Number Bhasa (Bhubaneswari) and Amtala GP. They also distributed milk powder to approximately 350 mothers with children ages between 0 to 12 months.

Cooked Food Help:

They started running food kitchen at different centers spread out throughout the disaster affected region. They provided cooked food to 3500 affected villagers on a daily basis. MUKTI also provided some relief work at the Amtala GP. The sponsored one day food and meal for approximately 250 villagers.

Medicines, Clothes, Tarpaulin:

MUKTI donated medicines for 200 persons to a government run medical center and also donated clothes for 50 persons and distributed to the needy people in the affected villages. They organized camps in

temporary shelters with the tripals provided.

They tried to help displaced people back to their home with food for few days. 200 mosquito nets were given to victims in Nandakumarpur, Mathurapur-II.

'Food for Work' Drive:

MUKTI successfully finished 'Food for work' program. They reconstructed river embankment at Dakhin Kashi Nagar in Herabagopalpur GP, Kuyamuri, Purba Chintamonipur, Damakal Ganga Ghat in Nagendraapur GP, Banashyamnagar GP and Amtali GP.

Post Aila Activities

MUKTI arranged few medical camps to help people to fight with different illness. These water borne diseases usually provide more hardship to the already affected people following a great disaster like Aila. They also executed rehabilitation program for restoration of local water bodies to provide sweet water and to restrict spreading of diseases. MUKTI helped farmers by distributing cultivated Paddy Seedling, teaching different agricultural practices that are economically viable, environmentally sound. They also provided educational materials to many helpless students.

Medical Camps:

MUKTI arranged few medical camps in different places to help flood affected people

to fight with different illness. They treated around 450-500 patients in Kumirmari, 200 patients in Gosaba Block 2 (Chowrasta), 300 patients in Haripur, Madanganj and Chandanpiri under Namkhana Block. All patients were provided proper treatment as well as medical counseling. Most of the people were suffering from stomach upset, dysentery, skin disease and other water borne diseases. ORS was also distributed among patients.

Sweet Water Projects:

MUKTI started their rehabilitation program for restoration of local Water bodies to provide Sweet Water among Aila victims and restricting spreading diseases. MUKTI cleaned nearly 12 ponds in G-plot area comprising 7 villages and 10 big community ponds in K Plot GP of Pathar Pratima Block.

MUKTI Educational Rehabilitation Program (MERP):

MUKTI provided educational materials like books, white paper, pen, school bag etc to Aila affected students who have lost their house and all belongings and not able to continue their studies.

500 students in each GP from class V to X got books from MUKTI. Besides this MUKTI distributed school books for all classes

from 5 to 12 in 3 schools and educational materials to 167 students in Dakhinkashi Jana High School.

Paddy seedling to support Agriculture:

MUKTI team cultivated Paddy Seedling in Kumrapara, Nandakumarpara, Kakandighi and Nagendrapur and handed it over to more than 100 farmers, who were helpless as they could not germinate seeds as acres of land were submerged under saline water. MUKTI also joined hands with SUNDER-

BAN DEVELOPMENT BOARD (SDB) and distributed paddy seedlings to 180 acre of land in extra remote area like Basanti.

Sustainable Agricultural Project:

MUKTI and BTS jointly finished a pilot Sustainable Agricultural project with the help of AID. They helped farmers to adopt agricultural practices that are economically viable, environmentally sound. They were trained to prepare seed bed like how to raise crops in their home gardens, containers and community fields. They are also trained to prepare Bio-Inputs like Amrit, Fish, Coconut and Herbal Tonic. These microbial rich bio solutions are the main component of soil reclamation process.

It will drastically reduce the cost of cultivation and improve the soil fertility. Practical

demonstrations are given to the farmers. Main area of work was Kultali, Patharpratima and Mathurapur CD Block. Each farmer is supplied 50gm Bin, 100gm Palon, 25gm Mula, 12.5 gm Piring and 12.5 grm Kolmi to start their work. Women self help groups already functioning in the villages. MUKTI is encouraging them for a large

scale preparation of bio inputs and selling to the villagers.

Control Global Warming and Save the Sunderban Rally

On 7th December, 2009, a rally program was conducted from Victoria Memorial gate to Netaji Indoor Stadium not only to raise a voice against the global warming but also to create awareness about its fatal impact on the delta region of Sunderban. Almost 30,000 people including environmental activist, journalists, common people and school students from different regions participated.

Activists of MUKTI participated to that rally and spread their specific demands for Sunderban at the program. They distributed fliers and cards to the Honorable Minister Kanti Ganguly, honourable delegates Mr. P. K. Banerjee, Mr. Sainen Manna, Mr. Masdur Rehman, Mr. Satipada Ganchowdhury and others. The papers are also distributed among participating people, students and press journalists.

MUKTI attended the seminar inside Netaji Indoor stadium and took initiative to launch a common forum to save and work for Sunderban. They invited like minded people, NGOs and associations to join the forum and work together.

The demands of MUKTI are:

- Make sure emissions peak in 2015 and decrease as rapidly as possible towards zero after that.
- Developed countries must make cuts of 40 percent on their 1990 carbon emissions by 2020.
- Developing countries must slow the growth of emissions by 15-30 percent by 2020, with support from industrialized nations.
- Developing countries must slow the growth of emissions by 15-30 percent by 2020, with support from industrialized nations.
- Protect tropical forests with a special funding mechanism – forests for climate.
- We need a monitoring and measurement body, who will be continually monitor Sunderban and design project for appropriate measurement.
- We need to setup sufficient wild animal

mal rescue flood relief centers along with human flood relief centre,

- Sunderban need national and international fund to act for stopping deforestation, and increase forestation.
- Climate change human and wild animal refuges need proper rehabilitation where international organization/country must be funding for these.

Support Save the Sunderban Project, Visit
www.SaveTheSunderban.org

Campaign for 'Save the Sunderban' organised by Uttarpara Ideal Youth Society

On 20th December, 2009 Members and activists of MUKTI did the campaigning for save the Sunderban. 14th Senior Citizen's Walking Race was organized by Uttarpara ideal youth Society, Uttarpara.

Main demands are

- Make sure emissions peak in 2015 and decrease as rapidly as possible towards zero after that
- Developed countries must make cuts of 40 percent on their 1990 carbon emissions by 2020
- Developing countries must slow the growth of emissions by 15-30 percent by 2020, with support from industrialised nations
- Protect tropical forests with a special funding mechanism – forests for climate
- Replace dirty fossil fuel energy with renewable energy and energy efficiency
- We need a monitoring and measurement body, who will be continually monitoring Sunderban, and design project for appropriate measurement.
- Along with human flood relief centre, we need to setup sufficient wild animal rescue flood relief centres.
- Sunderban need national and international fund to act for stopping deforestation, and increase forestation.
- Climate change human and wild animal

mal refuges need proper rehabilitation where international organization/country must be funding for these.

Exotic Bird farming Project by Self Help Group

Since Aila cyclone affected most part of Sunderban, current agriculture system and

a very significant effort to create entrepreneur among village women to generate

drapur and Kankandighi GP of Sunderban. The main target is to make low income

other income generation sources are almost closed for local people. So MUKTI put

source of income. MUKTI started several Self help group (SHG) project in Nagen-

village woman group independent.

Speech of Dr. Siddhartha Ganguly

and 9 from eight coaching centre participated. The discussion encompassed issues relating achieving true happiness without making others unhappy.

Dr. Ganguly also clarified that a state of unhappiness should not be accepted as destiny. He described how brain controls all the elements of our

speech. He mentioned how spending few minutes on each of these elements can enhance and maintain a comfortable state of mind and its expressions.

The discussion also emphasized on maintaining health, proper body weight, nutritious food habits and regular exercise to achieve happiness. The event did help the youth of Sundarban to have a clear idea regarding leading a healthy, successful and happy life.

The UN declared the year 2010 as the International Year of Biodiversity and International Year of youth. Keeping this and worldwide events for youth in mind, MUKTI India organized an event for the youth of Sundarban on 10th January, 2010. Dr. Siddhartha Ganguly, an Anatomist conducted a discussion leading a successful happy life through body and brain. The event was organized by Judhisthir Halder, Madhusudan Bairagi, Coaching centre teacher and other members of MUKTI.

The event took place at Santosh Gorai Balika Vidyalaya, Kankandighi, Sundarban, West Bengal, where 100 students of class 8

body and all the feelings of our mind.

He pointed out that everyone should spend some time each day thinking over the factors that brings happiness. He lectured over six critical elements of our body language – walking, arm position, eye-contact, posture, facial expressions and

*“State of Unhappiness
should not be Accepted as
Destiny”*

Educational Camp for Madhyamik (Standard X) Students

On 23rd January 2010, on the 114th birth anniversary of one of the greatest leaders in the Indian independence movement, Subhash Chandra Bose, MUKTI organized a two day educational program aimed at helping the students of Kankandighi Gram Panchayat and Nagendrapur Gram Panchayat to do well in the Madhyamik examination. The session was conducted by the teachers of Dumdum K. K. Hindu Academy. 28 girls and 36 boys of Kankandighi Gram Panchayat and 41 girls and 35 boys of Nagendrapur Gram Panchayat attended the program. The students were from Jata Nagendrapur High School, Nagendrapur Hetamkumari High School, Jata Jogen- drapur High School, Babujan Sipai High School and Panchanan Shikshaniketan.

On 23rd January the program started at 10 am with Mr. Probir Banerjee offering Floral tribute to Netaji Subhas Chandra Bose. This was followed by flag hoisting after which all the teachers of Dumdum Hindu Academy, teachers and volunteers of Mukti, students and villagers offered their respect and homage to Netaji. The first day's session span 7 hours where the key points for success in the Madhyamik examinations were stressed. The teachers emphasized on solving previous year's papers, complete revision, proper time management during exam, answering of full number of questions, careful reading of the question during exam, rechecking of answers and

proper organization of thoughts. At 5-30 pm on the first day after the educational session MUKTI India did arrange a cultural show by the students.

The show concluded with a song by Mr Nityananda Pal, the Head Master of Dumdum KK Hindu Academy. The accommodation and food for the students and teachers were arranged by MUKTI.

On 24th January the program started at 8 am. Chemistry, History, Bengali and Mathematics sessions were conducted by respective teachers who stressed on tips for scoring high marks in the examination like writing practice, maintaining proper time table etc. After the completion of the teaching, Sri Barun Halder was awarded for his success in the examination last year. Panchanan Das and Mamoni Halder, two students described how they got benefited by attending the educational camp. Soumen Jana, Animesh Bera, teachers of MUKTI and Judhisthir Halder, Raghunath Bairagi And Madhusudan Bera- volunteers

of MUKTI gave speech on the educational camp. The camp concluded with a cultural program by students of MUKTI Cochin Centre and floral bouquets were presented to all the teachers of Dumdum KK Hindu Academy by the students. MUKTI India is looking forward to successfully organize the

camp again for the next year's students.

Coaching Center Project

The project target villages are extremely rural and isolated from the basic luxuries of development.

In these area only 70% of children are going to school and there is a lack of schools.

The entire population residing in these area is still struggling to revive themselves from the destruction caused by the disastrous cyclone AILA that had hit the district in May 2009.

Distribution of Solar Lamps in Sundarban

Sundarban, the largest inter-tidal delta region of the world, is formed by the Ganges, Brahmaputra and Meghna rivers. The unique landscape of marshlands, dense forest of large mangroves and salt water swamp lying along the Bay of Bengal from the Hooghly River Estuary of India and the Meghna River Estuary in Bangladesh is also the home of the famous Royal Bengal Tiger along with many birds, crocodiles and other forest animals and aquatic creatures. Besides its characteristic flora and fauna, Sundarban is also inhabited by more than 4 million people of which approximately 60% fall below the poverty level.

Due to disadvantageous geographical location and non-availability of grid quality power the residents of Sundarban suffer from chronic shortage of electrical energy and have to depend on expensive and inconsistently available kerosene oil for lighting purposes.

On 25th December, 2009, MUKTI India, in

collaboration with MUKTI for Social Development, USA and OneMillionLights, USA distributed 40 solar lamps among the talented but needy students some underprivileged villagers of Dakshin Kankandighi, Sundarban, West Bengal. This marked the initiation of the partnership between MUKTI for Social Development, USA, OneMillionLights, USA and MUKTI India. MUKTI for Social Development, USA is a California, USA based NGO focused on fostering self reliant and thriving communities amongst low-income and under-privileged and on creating nurturing environment where every individual in the society can reach their full potential. OneMillionLights, USA is a USA based NGO trying to reach out with their solar projects to people in parts of the world where there is no electricity. MUKTI for Social Development arranged for the necessary funds, whereas OneMillionLights matched three-fold for the initial lot.

The event was organized by Mr. Judhistir Halder, Coordinator of the Coaching Centre Project and other members of MUKTI India. Mr. Himan Mukherjee, representative of MUKTI for Social Development and OneMillionLights, Ms Koel Ghorai, Chief Coordinator of the Solar project of MUKTI India and Mr. Debabrata Halder of MUKTI India distributed the lamps.

Mr. Andrew R o h a n Prashant, an MBA student of Army Institute of Management, Kolkata was present during the event and contributed by e n a b l i n g

MUKTI to treasure the memories of the event in the forms of pictures and videos.

The distribution ceremony was accompanied with an interactive training session aiming at imparting correct knowledge regarding usage of the lamps instead of kerosene lanterns for lighting purposes. The audience response in the event and planning for further progress in the solar projects between the collaborators of the event promised success for the future solar projects.

Do you Know?

"Every hour on the Earth's surface falls enough solar energy to meet world energy needs for an entire year. Our energy problems would be solved if we find a way to harvest that energy."

Village Computer Literacy Program (VLCP)

MUKTI Designed a grand project called 'Village Computer Literacy Program' (VLCP) with the sole noble intention of imparting free and needed computer education to the poor and interested students of the Sunderban area. The program was imparted with the help of Tata Consultancy Services Ltd. (TCS) which donated total 19 computers to MUKTI. With the much needed input, MUKTI went on to set-up four different labs; one within the Kashinagar High School situated in Kashinagar near Kakdwip in South 24 Parganas district; one at Guptipara situated in the Hooghly district of West Bengal; one at Bankura facilitated by MUKTI

Bankura chapter and the most recent one at a Coaching centre at Gobindapur village, near Kakdwip.

The Kashinagar High School is a mid to large size school comprising of approximately 750 students. The students are studious, meritorious but unfortunately do not possess the liberty of even having a computer in reality in their lives. Four computers from TCS were donated to this school which set-up a computer room. The teachings were impacted by computer literate teachers from the school, trained initially by two MUKTI volunteers who even helped with the set-up of the computer room. Not only the students but even their parents were excited. The classes are organized twice a week. Since learning computers is a huge subject in itself and that these students were relatively unknown to this subject, the training program was primarily divided into two parts

The first was to impart Practical knowledge (Microsoft Office software packages like

Word, Excel, PowerPoint, and MS Paint) and the second part was to impart Theoretical knowledge (basics of computer system, its architecture, numbering system

work. Her smiling photograph along with the other photographs of the school, instructor and curious students and provided below this document.

etc.). The main emphasis was for students to have realized the knowledge of computer system and its application which in turn would help them in their higher studies. Keeping in mind the limitations in number of computers and training personnel (1 teacher and 4 computers), the computer classes were not made compulsory to the students. Only interested computer education seekers between classes V to X were entertained. MUKTI received wide support from the school headmaster, Mr. Shyamal Samanta, who has been very keen and enthusiastic of the project. He is also happy with the progress of his students' education in this subject. His idea aligns with ours in the sense that if we can provide and arrange more computers in the future, more and more students can facilitate from the program and make a better living or higher studies through it. Talking about students, a classic example of one of the brightest is Ms. Swagata Mandal of class VI. She has already started showing confidence not only in operating computers on her own but also realizes that her dream to become a doctor is not totally unrealistic and it will come true through vigorous hard

Even though West Bengal Examination Board does not make it compulsory to conduct examinations in this subject, MUKTI volunteers routinely made surprise performance checks of the students through examination, informal queries and questionnaire to random students. Not to our amazement and to our pleasure, MUKTI evaluation of the VLCP program at Kashinagar High School was found to be very progressive. One of their main inputs was that it is indeed true that the students were getting well acquainted with the subject which was not even heard of by their parents a year back.

The same is the story at Guptipara at Hooghly district which is primarily a computer centre for the sole purpose to impart training to the needy people free of cost by providing them career oriented training. The trainings are mostly on application packages on topics related to Finance, AutoCAD, and Tally etc. The trainings are imparted by a computer learned person along with two more local Guptipara volunteers using two computers.

A huge round of applause and thanks definitely goes to TCS since their computers are key in shaping futures both for school students as well as trained personnel who otherwise would never have dreamt to learn these important subjects amidst their socio-economic hardships. VLCP has been in past and will be in future, a very successful program in creating a big and positive difference for this impoverished section of society.

MUKTI Book Bank Project 2009-2010

MUKTI Extended its Book Bank help to 14 Aila Affected Schools of Sunderban. The Book Bank is the student resource for all the Course Books that a student may require for his academic pursuits from Class 5 to Class 12. The Book Bank offers issuing of books and also provides all enrolled students with all his course books for a period of one year. Our books go to children, the ill, and the indigent, in places where there is no access to books.

MUKTI Stretched their hands to help 1500 students in 5 Block areas of the Aila affected schools. MUKTI successfully organized MERP (MUKTI Education Rehabilitation Programme) in different school in the area namely Kultali, Jharkhali, G plot & K Plot. MUKTI Volunteers visited the individual School & distributed the book where the student does not have access to books for further studies. Before distributing the book to the school.

MUKTI team used to purchase the books from local agent & do the necessary work in the MUKTI office i.e. segregating the books by class wise. The team including photographer used to start early in the morning from MUKTI Office.

The volunteers have to travel several kilometers by crossing the river & moved through designed motorized cart & distributed the books to several remote schools

with the help of Head Master & Teachers. All this activities used to take entire day.

The camp operated from 7am to 5pm. This book bank project has held from June 2009 to August 2009 and the schools where the programmed has been held as follows:

Name Of the School Block Nagen-
drapur H.K. High School Purba gurguriya
high school Herobhanga bidyamandir.
Khagendrasmriti bidyamandir Ambika
Nagar high school Babujan Sephai Hgh

School Shibnagar Mokshoda sundari Kuyemuri uchabidyalay Dakshin Kashinagar high school Bhubineswari Joykrishna High School K-Plot Girls school G-Plot High school Jata Nagendrapur High School.

MUKTI successfully completed the service and have helped the student community in large to obtain their books of study easily. We have served more than 1500 students from various Secondary & Higher Secondary School for the area of Kultali, Jharkhali, G plot & K Plot.

1500 Students in 5 Blocks of Sunderban area received help through Book Bank project in this year of 2009-2010

*Do you know?
Women receive
on average only
1.8 years of
schooling in
India!*

TSS Program by MUKTI

The TSS Project is a scholarship program created by MUKTI through which individual students are provided with the support required to get access to a structured education. This proposal, prepared by the board of MUKTI, outlines the financial support required for implementation of the project. Additionally, MUKTI requests the sponsor to consider extending financial support over several years for the selected student so that the targeted student can get established in his/her life.

Total 110 students from 24 Parganas (South & North), Bankura and Midnapure were sponsored in this year.

The selection of students is based on both means and merit. The following criteria are used for selecting students for TSS funding:

- Past results from school exams and feedback from their respective school teachers are indicators of the student's ability.
- Local knowledge and feedback is utilized to appraise a family's financial situation.

The approximate annual income of the family is used as an indicator to determine the family's inability to provide adequate financial support for their child.

The assessed annual budget per student is 5,000 INR in this year. This amount takes care of the following:

- All required textbooks will be purchased and provided to students by MUKTI.
- Other required expenses like school fees, exercise books, pen, pencil etc will be provided.
- A school uniform will be provided to each student.
- A small amount is provided to each student on a monthly basis to provide for some basic necessities such as nourishment (INR 100).

MUKTI will be gathering feedback on a

routine basis through its network of volunteers. This activity will be coordinated by MUKTI's regional Education Coordinator. Performance indicators such as updated school results will be gathered; feedback from school teachers will be solicited as necessary. MUKTI will track on-going needs for each student and will communicate this to sponsoring individuals/agencies to ensure that there is no interruption in a child's education. MUKTI will also elicit local feedback on the financial situation of the families.
